CARPET TILES

Easy maintenance and endless variations.

HUIYA accepts no liability whatsoever for any direct or indirect damage, from any kind, arising from the information on this product sheet

BEISIDE[®]
Raised access floor

Top Layer

Carpet tiles, to be applied afterwards

A raised floor is ideal for upholstering afterwards with for example carpet tiles. HUIYA processes the carpet tiles from almost all manufacturers. We combine the upholstery with the assembly of the raised floor. This ensures you an excellent end result, the risk of error is minimal and you only have one point of contact.

Finish Panel

Carpet tiles are usually supplied in a size of 50 cm x 50 cm. because of this the seams of the raised floor are neatly covered..
