TOP LAYER CARPET

Carpet finish and easily removable tiles!

HUIYA accepts no liability whatsoever for any direct or indirect damage, from any kind, arising from the information on this product sheet.

BEISIDE[®]
Raised access floor

Top layer

Carpet can be processed by factory

HUIYA can also carpet the floor panels directly from factory.

The floor covering of your choice is then glued to the panels and then made exactly to size by a CNC machine. The advantage is that the removability and accessibility of the lower compartment are very simple.

Finish

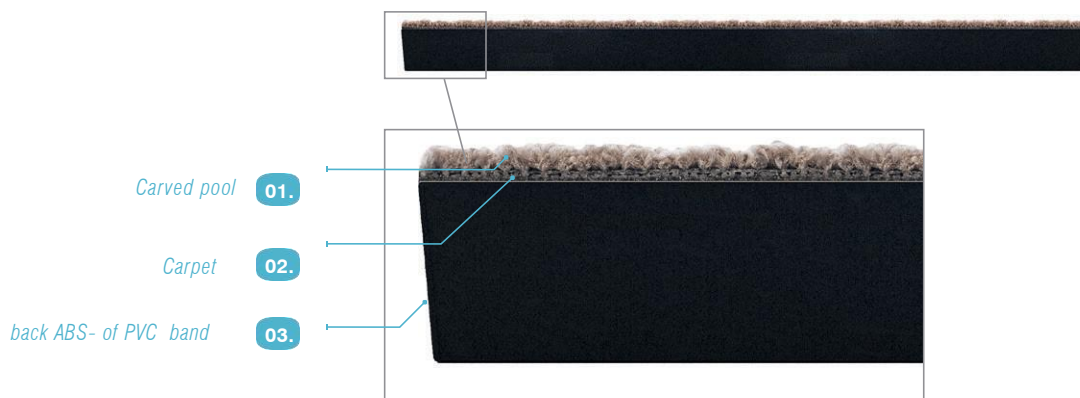

Panel

The carpet is glued on top of the panel and has the same size as the floor panel. This is one easy removability guaranteed.

Finish

Technical feasibility

Factory-applied carpet needs to meet a number of conditions. For example, the carpet must be provided with a cut pile and the backing suitable for machine processing. Please contact us to discuss your requirements. We find a suitable solution!

Factory-applied carpet is glued on top of a finished panel and then precisely tailored by our CNC machine. The edge band only encloses the panel.
